

COMPUTER VISION INTERNSHIP

INFINITY WAVE

DATA ANNOTATOR INTERN

at **Infinity Wave Inc**

WEEK 1 INTERNSHIP JOURNEY

Pitch Annotation

Polygon annotation in CVAT

PITCH · POLYGON

Learning how to annotate the cricket pitch accurately for computer vision datasets — the foundation every other annotation in the frame is measured against.

Bowling Stump Annotation

Zoomed bounding-box detail

STUMPS · BOUNDING BOX

Learning precise object localization using bounding boxes — small, fixed objects like stumps demand tight, pixel-accurate boxes.

Bowler Annotation

Player tracking in motion

BOWLER · TRACKING

Annotating players while maintaining labeling accuracy and consistency, even as they move through the frame.

Batsman Annotation

Player annotation for analytics

BATSMAN · TRACKING

Understanding player annotation for AI model training and sports analytics datasets — data that eventually powers performance insights.

About & Week 1 Overview

Infinity Wave Inc · Data Annotator Intern

Infinity Wave Inc works at the intersection of artificial intelligence and computer vision — building the labeled data foundations that power modern AI systems.

WEEK 1 OVERVIEW

1

Got hands-on with CVAT — Explored the annotation platform used for labeling match footage.

2

Annotated the pitch — Practiced polygon annotation to mark accurate pitch boundaries.

3

Labeled key match elements — Drew bounding boxes for stumps, bowlers, and batsmen across frames.

4

Built labeling consistency — Focused on the accuracy and consistency reliable AI training data needs.

SKILLS DEVELOPED

Data Annotation

Bounding Boxes

CV Fundamentals

Dataset Quality

Attention to Detail

AI Data Prep

Label Accuracy

Sports Datasets

KEY TAKEAWAYS

- ✓ Precision matters in every annotation.
- ✓ Consistency builds reliable training data.
- ✓ Great AI starts with great data.

Thank You

Excited for the upcoming weeks at Infinity Wave Inc.
